PROJECTS

Kharchaa as Minor Project-I

An expense management system built with HTML, CSS, PHP, JavaScript, and MySQL. This system tracks daily expenditures on basic necessities and allows users to add and delete expenses.

Sportify as Minor Project-II

In a sports management system, managing data on paper can be tedious and time-consuming. Therefore, students can log in and sign up on the platform. They can select games from a list based on their preferences. However, sign-up requires a college email.

Online QR voting

"# QRVoting" For 10th IT Expo GCES i have made this project where the users can scan through their devices respectively. Here the users can give maximum votes to 3 project.

HARMONIX as Major Project

This project involves audio source separation, where vocals and instrumental tracks are separated using Spleeter.

Logical Gate

his project is a JavaScript-based tool for visualizing logical gates. Users can create and interact with various gates to see real-time outputs, providing a practical tool for academic practice.
